

# Metro Districts

A brief history on our District stains; years ago when the developer and/or the builder first used the "Traditional Russet" stain it was manufactured by Kwal and they used an oil base stain. Then the Districts switch to a Kwal water based stain ("Environmentally safe"). This basic switch can made the fence stain look a little different on each fence. Then Kwal went out of business, and the Districts had to switch base stain (Stain before color mix) and manufactures of the District stain.

The Districts choose **Sherman Williams** "Traditional Russet" stain because it was **a close match** to what fence stain exists in the community and we have a Sherman Williams store nearby in Fort Collins.

Over all the new approved Sherman Williams "Traditional Russet" stain for the Districts may not match existing fence stain exactly but we have the "Traditional Russet" stain appearance in the community where fence stain is required.

## **Please Note:**

If only staining a portion of your fence the **Sherman Williams** "Traditional Russet" stain may not be an exact match, which may cause you to stain your whole fence if you want it all to match the new "Traditional Russet" stain.
