

METRO DISTRICTS

To: Metro District Residents

April 2021

Hello,

As you know the COVID-19 issues is causing a lot of uncertainties around the communities as what to do or not do. One question we get a lot is when will the swimming pool open on time or even be opened? As of right now the District should be able to open the pool as scheduled with limited restrictions. As the District is waiting on any new regulations/guidelines we are going to move forward on getting the pool ready to open.

We have spoken with the contracted pool management company (A & B Pools), they state they are at full staff for opening as scheduled which would be 5/28/2021. We have A & B Pools ordering the chemicals and chlorine as normal. We fear if we wait to hear from the State and Federal Government as to when we can open the pool, it may be hard to acquire what is needed to open and maintain the pool on time or at a new date. If any pool chemicals and chlorine are not used this year, they will be stored for next year.

Over the next few weeks, you will see activity at the Community Pool area, we will be having the boilers maintained and inspected by the state, the plumber will prep all water lines to the bathrooms and drinking fountains, and the shade covers installed. We will have contractors power washing outside of the pumphouse/guard room and cleaning the pool furniture if we can use and pool deck, flush and clean all piped lines and filter casings, along with the actual filter cleaning, and testing the new chlorine injection pump we just installed. Then maintenance on the heater all in preparation for opening day. We will be setting up cleaning service on the restrooms. (Pest control is year-round) Yearly Inspection of playground in Pool area and repairs, along with any COVID-19 cleaning if required. The District feels we should move ahead as normal and wait to see what happens.

At worst, the worst case we hold off on fully filling the pool and heating the pool until we know for sure what the opening date will be if allowed to open. It will take about 4 to 5 days to fill the pool to capacity and get the pool to the correct temperatures of 82 to 84 degrees.

One additional item to be set up after the pool opens would be a power wash crew to clean all pool furniture (if in use) and cleaning service as required for the bathrooms under COVID – 19 requirements. Not sure what will be required under the new COVID-19 policies and what that cost will be to our budgets. Overall, we will wait to see what the requirements will be then set up schedules and opening as current budgets allow.

Quarterly Fees for Operations and Maintenance:

Quarterly O and M Fees go out every quarter and the Districts THANK YOU for paying on time. Please make note of due dates. Any past due Operations and Maintenance Fees will be assessed a \$25.00 late fee after due date and then every 30 days a late fee will be assessed until paid in full. To avoid late fees or collections please pay O and M fees on time. Past due is payments received after the 1st of the month. Late Fees are determined by USPS processing date on the envelope, not the date on your check or the e-mail notification from the bank if you pay on-line. If you ever have any questions on your quarterly fee, please contact the South Timnath Metro District.

All residents must be in good standing with the District to have their Community Center/Pool Fob issued and or re-activated. District members in good standing are paid in full on their taxes, O and M fees, along with no outstanding covenant violations. **Quarterly fees are due the following dates of each year. March 1** (January, February, and March) **June 1** (April, May, and June) **September 1** (July, August, and September), **December 1** (October, November, and December) **Payments can be made online; you can send in a request to have an invoice with a payment link e-mailed to you.**

Operation and Maintenance Invoices and statements:

The District must invoice each lot owner/homeowner every quarter for the O & M fee. The invoiced amount will be added to your balance or taken off any credit you may have. If you owe more than the quarterly invoice amount, this amount will show in the "Total Amount Due" box about the middle of the invoice and if you have a credit on your account there will be a minus sign in front of the amount in the "Total Amount Due". If your account is current, it will show zero due. As always if you have a question on your account, please give us a call.

We are slowly switching to where all invoices will be e-mailed to you and then you have an option of paying online if you choose. If you do not want to pay online you can mail in your payment and/or [put the payment in the onsite Black Metro District drop box at the Community Center](#), located on west side of driveway.

If paying by check or money order, mail your payment to the District mailing address:

STMD * 6000 Summerfields Parkway * Timnath, Colorado 80547.

METRO DISTRICTS

Trash day for STMD is Tuesday:

The board has chosen Tuesday as trash day, as not to have trash/recycle bins/yard waste sitting out several days a week. Also, not to have several trash trucks driving around the neighborhood all different days of the week. This helps with wear and tear on the street and just general safety for all in the neighborhood. When it is not trash day, please keep your trash cans in your garage or behind your fence, do not store trash cans on your driveway or in your front yard.

Do not leave Trash cans out:

Trash cans must be put away in your garage or behind your side fence when it is not trash day (Tuesday). Please be considerate of your neighbors/neighborhood, do not leave trash cans out.

Architectural Design Application:

The "ADA" is used for when you are doing any landscaping or doing any modifications /up-grades to the exterior of your existing home. If you're placing a deck, concrete patio, covered patio, upgrading your landscaping, painting your home or any exterior projects you must submit the Architectural Design Application ("ADA") with a drawing of your lot/house showing the work for review and approval. Review fees may apply. You can find this document on the District web site. Just go to southtimnathmetrodistrict.com, on the home page click on the documents tab. You will see this document listed first. Also, check if your contractor needs to be licensed in the Town of Timnath before the work starts.

Tree Lawns:

The tree lawn is the area between the street curb and your sidewalk. The builder and or the homeowner are required to place a minimum of 1 tree (More in some phases) in the front tree lawn and or multiple trees if you're on a corner lot, you must place trees in the tree lawn alongside your home. Keep in mind Town site distant requirements or street signage when placing trees and or your fence. It is the homeowner's responsibility to keep these trees maintained (pruned) and the grass maintained in this area. Please keep an eye on your tree lawn area in front of your house and around the side if you live on a corner. If any of your trees dies or starts looking bad in the tree lawn area they must be replaced. Replace any dead trees with a **2 - inch in diameter deciduous tree**. Ornamental/low growing tree are not allowed.

Homeowner Fence Stain:

If you want to stain your fence in the Summerfields area, please use the approved stain. The approved fence stain for the entire community is **Sherman Williams Traditional Russet**. Fence stain in The Preserve, Prairie View, Tall Grass and in the Meritage Homes area is mandatory. All new Filing's and phases' fence stain is mandatory. You must keep up the maintenance of the on your lot; this means in Colorado staining the fence every 3 to 4 years. When you make repairs on your fence, please stain the new fence parts. Clear stain is not allowed, it never turns out to be clear.

A brief history on our District stains; years ago, when the developer and/or the builder first used the "Traditional Russet" stain it was manufactured by Kwal and they used an oil base stain. Then the Districts switch to a Kwal water-based stain ("Environmentally safe"). Then Kwal went out of business, and the Districts had to switch base stain (Stain before color mix) and manufactures of the District stain.

The Districts choose **Sherman Williams** "Traditional Russet" stain because it was **a close match** to what fence stain exists in the community and we have a Sherman Williams store nearby in Fort Collins.

Overall, the new approved Sherman Williams "Traditional Russet" stain for the Districts may not match existing fence stain exactly but we have the "Traditional Russet" stain appearance in the community where fence stain is required.

District Owned Fence:

The District will re-stain the outside of the District fences about every 3 to 4 years. A notice will be sent out when the work is about to start. As the community grows the District will map out the site as to schedule fence staining a section of the community every year.

Do not attach any items to the District fence. Do not attach bird houses to the District fence or place next to the District fence. Keep in mind to be careful where you place birdhouses, even in your own back yard, the waste from the bird's ends on your neighbor's fence and or yard. Keep trees and shrubs from growing on the District fence. Keep in mind the District needs to maintain the District fence. The District does have a 3' fence easement where District fence is placed.

METRO DISTRICTS

Landscaping Maintenance:

After you spend time and money on your yard, please make sure your landscape in front and/or rear of your home is neatly maintained, including shrubs and trees. Pay close attention to shrubs and trees that are planted near the sidewalk. Please remember to prune your trees and shrubs, this will improve and maintain the health of the trees/shrub plus promote grow. Edging should be properly secured and maintained in an attractive manner. All dead trees in your yard and in your tree lawn area must be replaced. If you are on a corner, try and prune tree as not to block views. A neat tidy yard makes the community look better. Trees in the tree lawn should be replaced with a 2-inch caliber deciduous tree.

Home Painting & Maintenance:

It's that time of home ownership where the folks that live in Summerfields Phase 1 and soon Phase 2 to be painting the exterior of your homes and/or budgeting for that expense. A lot of homes have taken on this task, but this is a reminder to the folks that have not repainted their home as of yet. Please start to get proposals and plan on painting the home here in the near future. Also, it may be time to look at shutters and other areas on the exterior.

Neighborhood Mailboxes:

Cluster boxes are provided by the developer/builder at time of development. Cluster boxes meet USPS specifications and are placed in locations that the USPS has chosen. **The District asks that no posting/advertising be placed on the mailboxes.** Please keep in mind, mailboxes are in the street ROW, in doing this some mailboxes are on your neighbor's lots, please do not walk in their grass or leave postings in their yard.

District Maps:

We have District maps on our web site showing the District Boundaries, showing what sidewalks the District does snow removal on, the District Maintenance map and so forth. You will see the new developed areas added to our District maps as they are approved and or accepted by the District. The District does not have anything to do with any of the zoning in our District boundaries. The Town of Timnath is responsible for zoning. The zoning for the Districts or any planned development in the Districts have not changed since 2008. Some road lay outs have changed and or lot counts. (Undeveloped areas subject to change, with Town review)

Garage Sales:

This is posted on our web site, the same weekend's every year.

The following Saturdays have been chosen for the South Timnath Metro District Garage Sales.

SPRING Garage Sale: The third Saturday in the month of May starting at 8:00 am ending at 4:00 pm.

FALL Garage Sale: The second Saturday in the month of Sept starting at 8:00 am ending at 4:00 pm

The District will place ads in the Fort Collins Coloradoan and on the web (Craig's List), along with placing community signs. You are encouraged to run your own ads in the local papers or web sites highlighting your special items for sale. Mark your calendars and start pulling out all the unwanted treasures your basement or garage has to offer. Garage Sales will not be rescheduled due to inclement weather. The District places the ads with the publications in advance as to meet print deadlines; we do not always know what the weather will be. You do not need to contact the District to participate in the event.

Homeowners can have Garage sales any time during the year that they wish, however, the District requires that any signs you have put up be taken down immediately after your garage sales ends.

Detention/retention Ponds:

The Districts have several dry and wet detention/retention ponds within our boundaries. It is the District responsibility to keep the detention ponds working as designed. This is cleaning the edges of detention/retention ponds, the outlets, and inlets, along with cleaning and maintaining the rip rap that is in place.

The short non-technical story is that the detention/retention ponds were designed by engineers as a part of an overall drainage plan for the area to help with any flooding issue that may occur. As you can see by our community with all the new streets and homes, this has changed the water shed for our area. Due to all the asphalt, concrete, and roof tops, when it rains/snows your lots were designed to shed the water off your lots, into the streets then into the storm outlets, then into the detention/retention ponds. Then from the District detention/retention ponds the water shed flows off our site into other water ways downstream.

METRO DISTRICTS

The detention/retention ponds retain the water (Rain/snow fall) for a limited time. The outlets in the detention/retention ponds were design to let the water out over time. Therefore, you see the detention/retention ponds fill quickly during a rainstorm or heavy snows, then over time the water level slowly recedes. The detention/retention ponds on our site work as they were designed, to help prevent flooding in our community and downstream.

The detention/retention ponds (Pond #1 and Pond #2) that retain water in the Districts are maintained by the Districts. The Districts places sludge remover, (Waste and Sludge Reducer) and place algae growth control (Aquatron) in these ponds to try and control the algae growth.

With the runoff from the yards and streets going into the detention/retention ponds it hard to control all the algae in the detention/retention ponds due to all the streets run off of fertilizers from the yards and the District green belts. Therefore, it is important not to blow your grass clippings/trash in the gutters; it will end up in the detention/retention ponds.

Then once we get the products (Aquatron and Waste and Sludge Reducer) in the ponds and they are working as designed, we get a rain or snow and that changes the makeup/balance of the detention/retention ponds. Once this happens, we almost must start over with our products.

The products we place in the detention/retention ponds are environmentally safe but must be placed in limited amounts over 3 to 5 weeks as not to harm the detention/retention ponds aquatic growth and fish. The District has come up with a maintenance plan with a company that works on detention/retention ponds; we are trying to control the algae.

Along with the wet detention/retention ponds, the district has several dry detention ponds within the district boundaries that have to be maintained, by cleaning inlets and outlets, mowing the area, along with cleaning up leaf's and trash on regular maintenance schedules. Plus, cleaning concrete pans and drainage swells that are in portions of the Districts. All these drainage items are part of the drainage system for the Districts. These costs for the drainage systems are on the budgets under the Irrigation and ditch maintenance section of the posted budget.

Dog Poop and Dogs on the Loose:

We receive e-mails and calls on this one a lot: Pick up after your pets when walking through the neighborhood. Do not walk your dogs on your neighbor's yard. The light pole or fire hydrants are tempting for your dog, but most of the time they are in your neighbor's yard. **Please pick up after your pets.**

Walking your dog: Please keep dog on a leash or have full control of your dog when off a leash. If your dog runs up to someone and or their pets, it is not under control, put dog on a leash. If your dog is on a leash, keep control and keep the dog from jumping on people or going after other pets when on a leash. Some people are frightened when a dog runs up to them or their children and/or pet, they don't know the dog's intentions. To avoid issues, leash your pet.

Below and on the next page are some of the Town of Timnath Ordinances:

Animal Waste- No owner or custodian of a dog may permit it to leave feces or upset garbage on public property or the private property of another. 7.3.12 (Ord. 20-2007)

Animal Nuisance/Barking- It is unlawful for any person owning or keeping an animal to fail to prevent such animal from disturbing the peace of any other person by loud, persistent, and habitual barking, howling, yelping, mewing, or making any other loud, persistent and habitual noise whether the animal is on or off the owner's premises. 7.3.19 (Ord. 20-2007)

Loose Dogs- A person who owns a dog shall keep that dog confined or controlled. Confine means to control the dog in a fully fenced yard, kennel, or other fully enclosed structure. Control means to restrict the dog's movements to prevent violations of the Town's ordinances. A dog should not be allowed to roam the neighborhood or have access to other people's property. 7.3.18 (Ord. 20-2007)

Proper Control- Controlling a dog means to simultaneously monitor, direct and restrict a dog's movement and activities in a humane manner. The following types of control are recognized for the general public:

Control by leash- To control a dog by securely attaching a leash, chain or an item which is physically capable of restraining the dog, including electronic collar, to the dog which is in the secure possession of a person physically and mentally capable of monitoring, directing and restricting the dog's movements and activities.

Control by attachment- To control a dog by a harness or other similar device attached directly or indirectly to a person or immovable object by means of a chain, leash or similar device in such a manner that when the dog is on private property, it cannot travel off the private property or into in any public vehicular or pedestrian way, or other public easement; or when the dog is on public property, the dog cannot travel more than three feet from the immovable object and is not unattended by the owner.

METRO DISTRICTS

Control by harness- To control a dog by harness or similar device attached directly or indirectly to a person or object during an event of competition, training, demonstration, or show.

District Greenbelts and Irrigation Watering:

This year the Water District has raised its prices for irrigation water, a second time over the past few years. We as the District are going to try extremely hard to conserve irrigation water where we can along with balancing the irrigation system to keep the grass looking healthy.

Stating this, the District will have to see how these new water rates affect the budget. If it becomes a burden on the budget, the O and M fee may have to be reevaluated for the 2022 or 2023 budgets. Budget review for the irrigation watering will not be taken lightly as we understand what the consequences of lower maintenance expectations and or raising the O and M fee can mean for residents.

The District is trying extremely hard to conserve irrigation water where we can along with balancing the irrigation system to keep the grass looking healthy, along with timely fertilization and weed control. During light rains you will see the irrigation system running, because we have rain sensors set at ½ inch, we must try and balance watering around storms. If the irrigation system shuts down and it is a light rain, that area might not get the turf areas watered for another day or two and in the summer that can hurt the grass. Sometimes we set the irrigation clocks to pre-soak an area, this is watering for 25 to 30 minutes and then 35/45 minutes later watering again for roughly 40 minutes. Presoak helps the water soak into the ground and prevent run off, stating this you will see zones on 3 or sometimes 4 times a day.

Keep in mind we have 5 two-inch irrigation taps and two 1 ½ inch irrigation taps with each tap having about 90 to 100 watering zones at 4 to 6 watering zones on at one time. Plus, watering schedules are worked around School bus schedules, trails, park play times, the pool area, some larger open spaces tracts for kids playing during the day and organized sports. Or a power outage can cause issues with our irrigation system, causing it to short out or just be shut off. If we shut down one or two zones or a whole tap due to weather or other issues, it has a lot of repercussions effecting sometimes over 100 irrigation zones. Stating this we try extremely hard to balance out the irrigation system with the community residents and all storms, winds, etc. If you see any issues in the green belts around the community, please send us an e-mail and we will check out the issues.

In 2020 the board is starting to change out old irrigation clocks and upgrade to the latest water programming systems. One irrigation clock has been upgraded in 2020 and a few will be upgraded in 2021 and then in 2022, remaining clocks will be up-graded. This is the first part of getting the irrigation systems up-dates. Once clocks have been upgraded then valves and zones will have parts changed out along with putting irrigation clocks on wi-fi. This will help with programming and making the irrigation system easier for water management. We can hook irrigation systems to weather stations, in help of getting correct watering completed.

STMD Board of Directors:

South Timnath Metro District No.1

Dino A. DiTullio, President & Chairman Term Exp: May 2022
Michael J. DiTullio, Vice Chair, Sec/Treas. Term Exp: May 2022
Jennifer L. DiTullio, Vice Chair, Sec/Treas. Term Exp: May 2022
Kara L. DiTullio, Vice Chair, Sec/Treas. Term Exp: May 2023
VACANT, Vice Chair, Sec/Treas. Term Expires:

South Timnath Metro District No. 2

Dino A. DiTullio, President & Chairman Term Exp: May 2022
Michael J. DiTullio, Vice Chair, Sec/Treas. Term Exp: May 2022
Jennifer L. DiTullio, Vice Chair, Sec/Treas. Term Exp: May 2022
Benjamin Palmer, Vice Chair, Sec/Treas. Term Exp: May 2023
Luke Wagner, Vice Chair, Sec/Treas. Term Exp: May 2023

If you are interested in being on STMD board for your district, please see the STMD web site after January 15th of 2022 to see the transparency notice on what to do. The District hires an election judge to run the elections with Larimer County.

That is, it for now, as always, any questions please feel to contact South Timnath Metro District.

STMD Office Phone number: 970-225-1515 * Fax Number: 970-225-0054 E-mail: manager@southtimnathmetrodistrict.com
